Tonight We Burn

Fightstar

Turn the light on tonight
The electrical fire is taking up my oxygen
I move my mouth to say your name
But nothing ever came, nothing for hours
Are you ready? Are you ready? Are you ready? I am
Are you ready? Are you ready? Are you ready? I am
This time it's all worth waiting for
We won't sleep tonight
This time it's all worth waiting for
I'll take you home
I believe tonight we burned out bright
I believe tonight we burned out bright
Tonight this town becomes our vice
Doused in white lights
Put on your shoes and find your best dress
This could be our finest hour, the night is waiting for us
Are you ready? Are you ready? Are you ready? I am
Are you ready? Are you ready? Are you ready? I am
Tonight this town becomes our vice

(Are you ready? Are you ready? Are you ready? I am)
Tonight is waiting for us
(Are you ready? Are you ready? Are you ready? I am)
This time it's all worth waiting for
We won't sleep tonight
This time it's all worth waiting for
I'll take you home
I believe tonight we burned out bright
I believe tonight we burned out bright
Open your eyes, look at the sky tonight
All dressed in white up with the satellites
Circling earth, they will be watching us
Just for tonight can I have the last dance?
This time it's all worth waiting for
We won't sleep tonight
This time it's all worth waiting for
I'll take you home
I believe tonight we burned out bright
I believe tonight we burned out bright
