

Questions

Ocean Colour Scene

There's a question
Everybody's shouting out a question
There's a question
Everybody's shouting out a question Have you got an answer, politician?
Have you got an answer, mathematician? There's a question
Ringing out a clear loud question
It's a question
Giving you one in the head, it's a question Do you have an answer, theologian?
A better answer than a politician There's a question There's a question
Ringing out loud in space, there's a question
And there's a question
Ringing out over the stage, there's a question Do you have an answer, politician?
Do you have an answer, mathematician?
Do you have an answer, theologian?
Do you have an answer, science man? Do you have an answer, Peter Pan?
Father and son, a mother and daughter
Son of man On and on and on and on and on
And on and on and on and on and on
