

# 540,000° Fahrenheit

## Fear Factory

Witness a blinding light, sudden bright light from a blast  
Pulsing radiation moving through cracks under skin  
Feel the fire in the wind  
Deadly kiss of scorching sandsNot a prayer of hope or redemption in your eyes  
Hell exploded on this earth to take all that's alive  
Standing at the face of death  
Terror stealing your last breathWatch the firestorm incinerate you into ashAll that you know burns away into  
dust  
So many lives  
So many innocent  
BurnEvery particle returns to its natural form  
Ashes into ashes blown away just like the dust  
Heaven burning with the sky  
Hell is not the reason whyFeel the firestorm melting your spirit into glassAll that you know burns away into dust  
So many lives  
So many innocent  
BurnSo many lives  
So many innocentAll that you know burns away into dust  
So many lives  
So many innocentSo many lives  
So many innocent  
So many lives  
So many innocentBurn  
Burn  
Burn  
Burn
