Nights Like Tonight

Stonebolt

It's come down to this moment
Just you and me
Being blinded by love for so long
It's been hard to see

The moon is still bright
And the stars are shining, too
But the nights are much colder
And so are you

Chorus:
Nights like tonight
You know we'd better stay at home
Nights like tonight, ooh
Are warmer when we're all alone
It always means so much
When I feel your touch, my love

Now our time's growing short
We can feel the change
When someone we thought we knew
Turned to someone strange

It comes to the point
Everything that we try and say
Gets blown to pieces
And comes out the wrong way

Chorus / Solo / Chorus

It always means so much
When I feel your touch, my love

The words come so easy sometimes
Then there's nights like tonight
When the last thing on your mind
Is making things right

Oh, the words come so easy sometimes
Then there's nights like tonight

When the last thing on your mind
Is making things right
