The Beauty

Shanti

patience comes to those of us who wait can we escape this life that we create we look outside to find happiness can you tell me what i missed. in time it'll come together and in time the pieces fit together in time we'll see all the beauty yeah, all the beauty it looks like i've got a ways to go why does it have to happen so slow i've heard the truth so now i know i can't go back to living in the shadows chorus you tell me that i'm the same as you and i can shine just like the rest do the flame's been lit and now it's time now it's time to shine chorus (x3)
