

When We Know

The Beauty of Gemina

When I'm singing
When I'm falling
When I'm breathing
When I'm smiling Then you get close to me
Then you get close to me
Forever
Forever We are lost in thought
New morning When you're singing
When you're falling
When you're breathing
When you're smiling
Then I get close to you
Then I get close to you We are, we are, we are still living
We are, we are, we are still dreaming
If we have our faith, our will
Then we can make all safe and real And the time will tell, will know
Won't fear the night, our night's still young
Before our eyes start fading
We hold our hands and waiting
And this will be one day
What we're living for If we know the name of our fear we're not in danger
If we will not change the way we go
And our loving heart is still a place for teardrops
If we notice all this
Then we know
Now we dream
Now we're sailing
We thaw the cold And in our heart
Is all we know If we know the name of our fear we're not in danger
If we will not change the way we go
And our loving heart is still a place for teardrops
If we notice all this
Then we know The fear is over ...
