The Glow

Cloud Boat

Take some of these candles
The glow will guide you out
Drink all of this water
And make sure that you tell me
This is not the end
This is not the endIt's with these I learn
That madness runs in circles
In hot water drift away
Until your skin is the color of calmIt's in steps and turns
That the fire ate the room up
It burnt holes in all the chairs
I thought I would make it pass the eyeTake some of these candles
The glow will guide you out
Drink all of this water
And make sure that you tell me
I should look out through a window
A hundred times a day
And swim out in the distance
To keep a sense of spaceCause this is not the end
Of everything ever
Now all your before
Is somebody's afterIt's with these I learn
That madness runs in circles
In hot water drift away
Until your skin is the color of calmIt's in steps and turns
That the fire ate the room up
It burnt holes in all the chairs
I thought I would make it pass the eyeIt's with these I learn
It's in steps and turns
It's with these I learn
It's in steps and turns
