

Incredible Thoughts

The Lonely Island

Incredible thoughts

Incredible minds

I'm so overwhelmed

How did my brain conceive them? A snow-white dove in the pitch-black night

A rain drop falls from tremendous heights

A wave crashes off of a cliff in Scotland

A child bites an apple, but the core is rotten

TV is free, but what is the cost?

We have GPS and yet, we're still lost

A carrot in the desert, a camel in the garden

A man with giant ears begging your pardon

What if a garbage man was actually smart?

A common misconception that we're tearing apart

And to a dog, dog food is just food

And to a sock, a mansion's just a big shoe

A Milk Dud, sitting in the acid rain

A housecat addicted to the cocaine

No teeth, unlimited floss

These are just a few of our incredible thoughts Incredible thoughts, incredible minds

Too many great ideas inside

It's a miracle my head can contain them

My spectacular brain

For all humankind

Changing how we think about space and time

Now it's time to share them with the people A ballerina waits for the bus

A number-one dad trophy covered in rust

An nun dunked in basketball living the impossible

A man breaks his leg inside a hospital

We just thought of that and it can change the world

World like a smart oyster full of pearls

Such as has an ultrasound of a new baby

With a Santa hat drawn on, yeah that's my kind of Christmas card

What if a butterfly was made out of butter?

These small thoughts could destroy Big Brother

The world's cutest kittens just hugging a dog

Just one of our incredible thoughts

What if one thought could cure the people?

What if one song could end all evil?

Imagine if a fish could play guitar

And also sing, it would sound bizarre like
"My name is Mr. Fish
These guys thoughts have granted my wish"
And that may have just changed the course of time
I swear my mind blows my mind, incredible Incredible thoughts, incredible minds
Too many great ideas inside
It's a miracle my head can contain them
My spectacular brain
For all humankind
Changing how we think about space and time
Now it's time to share them with the people, my brain is a genius Incredible thoughts
Incredible minds
I'm so overwhelmed
How did my brain conceive them?
