

# Valley Forge

## Iced Earth

Close your eyes and imagine, the soldier at valley forge  
The suffering that he endured was real  
Starvation, total war, yet in his eyes the iron will to win  
And for the cause, he won't relent Would he look upon us now in anger and disgust  
His providence a birthright and our creed  
Will we let ignorance and laziness bring our demise  
Complacency, we're blinded by our greed Standing barefoot, frozen bloody hands  
His musket clutched, an iron grip  
And for the cause, he has but one regret  
He's only got one life to give Would he look upon us now in anger and disgust  
His providence a birthright and our creed  
Will we let ignorance and laziness bring our demise  
Complacency, we're blinded by our greed It's time for us, to open up our eyes  
And cherish the lives we all can have  
And to the ones who kept our freedom free  
Words can't express all that you've done Would he look upon us now in anger and disgust  
His providence a birthright and our creed  
Will we let ignorance and laziness bring our demise  
Complacency, we're blinded by our greed
