

# Inferno

## Shakra

The result of a failure  
Genetic error  
A system out of control  
Creative energy  
Transformed into hatred  
A twisted perception of truthMankind breeds mortality  
Sickness passes on through generations  
The effect shows through genocideMalfunctioning mindsA bite of the fruit  
Termination activatedThis creation once destined for success  
Now violated and raped by one  
Given access to the heartland  
Evil dominion over their spiritsDivorced from it's creator  
Crying out
