

Hollow

Remy Zero

It felt like the sun
We are hollow
Light to the world
Film star Define all the ways
We are hollow
I am ghost
You are song So you walk
Way from me
Were you
Ever there? You were
Too quick
Or cold to believe
Unbelievable You can never fail
We can never fail
We can only go down south
In flames a place you forgot about Oh, we are hollow
Light to the world
Film star Define all the ways
We are hollow
I am ghost
You are song Lights that freeze
Turn perfect scenes
Into sorrow Don't slip away
With all the words
You had to say You never had a prayer
You can never fail
We can never lose
We can only come down
Sink to your knees
Let the others fire, sound When I fell out in the traffic
All their voices comin' at me
Comin' on in the street
She was every kind of creature
Every twisted up invention of a human face We're going in for one more kill
And the sound of their machinery
Devoured so many languages
And all of them said You'd be so ecstatic
To finally be with it
But fools will win the race

So dive back down to your bedAll your strength
Is about to be found
Crawling up
Out of the groundNow play what you wanted to play
You say what you wanted to say
You finally found a way
All of the stars coming downHow did it feel
When you
Hit the groundIt felt like the sun
We are hollow
Light to the world
Film starDefine all the ways
We are hollow
I was the ghost
You were songIt felt like the sun
It felt like the sun
It felt like the sun
I was the ghost
You were songIt felt like the sun
It felt like the sun
