Hollow

Remy Zero

It felt like the sun

We are hollow

Light to the world

Film starDefine all the ways

We are hollow

I am ghost

You are songSo you walk

Way from me

Were you

Ever there?You were

Too quick

Or cold to believe

UnbelievableYou can never fail

We can never fail

We can only go down south

In flames a place you forgot aboutOh, we are hollow

Light to the world

Film starDefine all the ways

We are hollow

I am ghost

You are songLights that freeze

Turn perfect scenes

Into sorrowDon't slip away

With all the words

You had to sayYou never had a prayer

You can never fail

We can never lose

We can only come down

Sink to your knees

Let the others fire, soundWhen I fell out in the traffic

All their voices comin' at me

Comin' on in the street

She was every kind of creature

Every twisted up invention of a human faceWe're going in for one more kill

And the sound of their machinery

Devoured so many languages

And all of them saidYou'd be so ecstatic

To finally be with it

But fools will win the race

So dive back down to your bedAll your strength
Is about to be found
Crawling up

Out of the groundNow play what you wanted to play
You say what you wanted to say
You finally found a way
All of the stars coming downHow did it feel

When you

Hit the groundIt felt like the sun

We are hollow

Light to the world

Film starDefine all the ways

We are hollow

I was the ghost

You were songIt felt like the sun

It felt like the sun

It felt like the sun

I was the ghost

You were songIt felt like the sun

It felt like the sun
