

# Quintessence

## Deep-pression

The demon skin is covered  
In fine mist  
Opened his hand in my hand  
Holding my eyes to the future  
Hovering above myself  
Letting loose the guided  
Punching these holes in my head  
The space time paradigm  
Omnipresence  
Primal instincts  
Let it go, let it go, let it go  
Let it go, let it go  
Calling reason, finding you  
These wild hearts run  
Even deeper, burning through  
These wild hearts run  
Let it go, let it go, let it go  
Let it go, let it go  
Letting me free the quintessence  
In fine mist  
Opened his hand in center

Holding my eyes to the future  
Hovering above myself  
Letting loose the guided  
Punching these holes in my head  
Losing my skin to the landslide  
Omnipresence  
Primal instinct  
Let it go, let it go, let it go  
Let it go, let it go  
Calling reason, finding you  
These wild hearts run  
Even deeper, burning through  
These wild hearts run  
Let it go, let it go, let it go  
Let it go, let it go  
Shield failure  
Speed farewell

Shield failure  
Speed farewell
