She Still Loves Him (Demo)

Jellyfish

He writes her a letter tells her he won't be home soon
(She still loves him)
He lost his temper belted his love cross the room
(She still loves him)Drinks when he's sad gets happy then mad at the world
(She still loves him)
Never remembers that day in September when wed
(She still loves him)She recalls the days when they were younger
Flowers could heal her wounds
Now those days are gone forever
Now her pain just fills every roomFaces aglow as the light from the TV show just separates them now
(She still loves him)
All they wanted to be was as happy as couple no. 3
On their favorite game show
(She still loves him)He recalls the days when they were younger
Future could heal their wounds
(Future could heal their wounds)
Now those days are long since gone forever
Now her pain just fills every roomI know someday this will all work out
She'll never face this alone
Light in her eye may be flickering dim
But she still loves him, still loves himShe recalls the days when they were younger
Future could heal their wounds
(Future could heal their wounds)
Now those days are long since gone forever
Now her pain just fills every room
