

Birds Don't Sing

TV Girl

She said how could you joke at a time
Like this
I know why, cause this is what you wanted all along
Now Isn't it? I think that all you ever really ever wanted
Was the reason to complain
That never stopped you before, don't let it get in your way Those are her words, not mine
As far as I'm concerned, we could have had a good time, so
If you walk out that door, you disgust me
I can't say nothing no more to discuss
()
Birds don't sing, they just fall from of the sky
Girls don't call, and they never tell you why
That's just how they say goodbye
Goodbye ()
Don't listen to my music, don't lie in my bed
Don't listen to the references
The things that you might have actually said Cause those were my words, not yours
As far as I'm concerned, it could have been a lot worse
I wasn't trying to avoid the confrontation
She isn't cryin', she was just makin' conversation
()
Birds don't sing, they just fall from of the sky
Girls don't call, and they never tell you why
That's just how it all goes down
Go down
