More Than Me

Greyson Chance

I lost my way on streets that I paved
When I was deep in the blue, you were gone the whole time
You fall behind and I say goodbye
When you drive to drink, I numbed my mindGone are the times we sipped on good wine
For the taste, yeah
Now you and I, we just drink what we find
Getting wastedYour memory near
Laced with the pain
I needed love but it's never the same
For I wanted more, you wanted more than meWhen the bottle is gone
In that silence I'll find
That life isn't nothing but chasing the time
For I wanted more, you wanted more than meOh baby, since you lied I've had restless nights
Heard you got a brand new me
Guess you're doing fineWhile you're getting through
All the things that you do, staying vacant
I drink what I find
Cause my angel's on high, staying wastedYour memory near
Laced with the pain
I needed love but it's never the same
For I wanted more, you wanted more than meWhen the bottle is gone
In that darkness I'll find
That life isn't nothing but chasing the time
For I wanted more, you wanted more than meThe smoke got cleared
When the days turned to months
And the months turned to years
For the anger to fade[x3]
When I took a step back
The realization came
You weren't looking at me
You were looking instead
Somewhere over my head
