

illuminati

Illuminati

I can't believe what's happening

Where is your self control

Why can't you just be honest

The corruption takes its toll

You rape our hope

Too proud to cope

You built this house of shame

You smile, you gloat

This disease you promote

An infection is what we are now

I can't believe this happened

The fear starts to grab hold

Then anger starts to take over

I will not be controlled

You rape our hope

Too proud to cope

You built this house of shame

You smile, you gloat

This disease you promote

An infection is what we are now

They're taking over now

Eating up our souls somehow

Taking over now

Parasites, they run around

The culprits won't be found

They lie behind this mask of wealth

They're taking over now

Illuminati they hide

You rape our hope

Too proud to cope

You built this house of shame

You smile, you gloat

This disease you promote

An infection is what we are now

You rape our hope

Too proud to cope

You built this house of shame

You smile, you gloat

This disease you promote
An infection is what we are now
