

Warmest Rising Sun

[Lou Gramm](#)

The way she moves alone, so late at night
The woman knows, she's a mystery
And she's mine tonight
That's all I want to know What would I do without her?
Who would I be alone?
You see I love everything about her
And I'd never ever let her go The wind blows cold tonight
I'm counting stars one by one
Holding her so close tonight
And I know she is my warmest rising sun Now I'm searching out her secret dreams
I wonder if she knows what her love means What would I do without her?
Who would I be alone?
You see I love everything about her
And I'd never ever let her go The wind blows cold tonight
I'm counting stars one by one
Holding her so close tonight
And I know she is my warmest rising sun
