

# Gate 21

## Serj Tankian

The love that you bring  
You bring me alone  
The pain that you give  
Gives me a home Do you wanna stay by my side?  
Do you want me to turn and hide?  
We are disappearing inside  
Seeing pictures of our goodbyes When we, we believe  
That our love will survive  
The pain that you bring  
Brings me all alone Do you love me, do you hate me?  
Do you wanna believe me?  
Do you think that you don't need me?  
Do you wanna deceive me? I can't take that it's all over, don't want to forget  
I can take the disappointment down  
I want to repress your goodbye, goodbye The design, we broke the mold  
The dreams when you see  
That goodbyes aren't for long Please follow me to the borders of destiny  
I don't want to break from your side  
The falling ground screams goodbye Please follow me to the borders of destiny  
I don't want to break from your side  
The falling ground screams goodbye Goodbye, goodbye  
The design, we broke the mold  
The dreams when you see  
That goodbyes aren't for long
