Teen-C Power

Bis

We have got the power to change
This world and to rearrange
This regime we're living under
One that tears us all asunderBut nobody wants to know
Happy in their country's hole
No use fighting them you say
They always will get their own wayThis could be the start of it all
We all want the system to fall
Get it right down on it's knees
'Cos we were born in the 70'sWe are young and we can cure it
Save our people from this pit
Of disbelief and great despair
Show them that it's us who careTime for revolution is now
No excuses this time let's go
Time has come, take that trip
Transmit it on the teen-c tipThis could beIt's so synthetic
It's so pathetic
On every hour
You can't stand the power
Teen-c power!Start the teen-c revolutionary
Your only real solutionThis could beIt's so synthetic, it's so pathetic
On every hour
You can't stand the power
Teen-c power!
