Conquered

Bastardizer

Tell me, tell me how you knew about my heart
You see, see the things that no one else could see
I thought, I was doing fine until you turned my life around
With everything you'd found, deep inside I thought that I had died
(You made me believe)
When I thought that love was gone, all gone
(You made me believe)
And you proved that love was strong, so strong
(You made me believe)
'Cause you touched inside of me
Something I would never have believed
Until, until you conquered me
You say, you can see our future in my eyes
You say, you can break the chain that always ties me down
Teach me how to fly again, you make my life complete
The love you give to me, deep inside I know this is right
'Cause you made me believe
When I thought that love was gone, all gone
(You made me believe)
And you proved that love was strong, so strong
(You made me believe)
'Cause you touched inside of me
Something I would never have believed
Until, until you conquered me
I was lost, I thought I would always be alone
I thought I could make it on my own
But you changed my life
Now everything I thought my life would be
Changed the day you conquered me
(Believe, you made me believe)
(You made me believe)
When I thought that love was gone, all gone
(You made me believe)
And you proved that love was strong, so strong
(You made me believe)
'Cause you touched inside of me
Something I would never have believed
Until, until you conquered me
(When I thought that love was gone, all gone)

When I thought that love was gone
(And you proved that love was strong, so strong)
And you proved that love was strong
('Cause you touched inside of me)
'Cause you touched inside of me
(Something I would never have believed until)
Something I would have never believed
Until you conquered me
(When I thought that love was gone, all gone)
When I thought that love was gone
(And you proved that love was strong, so strong)
And you proved that love was strong, so strong
('Cause you touched inside of me)
'Cause you touched inside of me
Something I would have never believed
