

Seers Of The Eschaton

Scar Symmetry

[Lead: KjellgrenLead: Nilsson]Born, a microchipped population
Spawned, a centralized reign of the elite
Funding both sides in neverending wars
Global control and fabricated causeThe pact intact across the aeons
A can of worms that feed our mindsThe heaven seen by those who lead is hell concealed
The seers of the EschatonTorn in compartmentalization
Scorn, the public mind mass imprisonment
Connect the dots and read between the lines
Behind the lens there's more than meets the eye
The pact intact across the aeons
A can of worms that feed our mindsSo they lead the rats into deep waters, lead us astray
For they lead their flock to gorges hollow, hunting their preyBorn, a microchipped population
Spawned, a centralized reign of the elite
Funding both sides in neverending wars
Global control and fabricated causeThe pact intact across the aeons
A can of worms that feed our mindsSo they lead the rats into deep waters, lead us astray
For they lead their flock to gorges hollow, hunting their prey[Lead: KjellgrenLead: Nilsson]Letting us sink and
slumber in cells of clay[Lead: Kjellgren]The heaven seen by those who lead is hell concealed
The seers of the Eschaton
Torn in compartmentalization
Scorn, the public mind mass imprisonment
Connect the dots and read between the lines
Behind the lens there's more than meets the eyeThe pact intact across the aeons
A can of worms that feed our mindsSo they lead the rats into deep waters, lead us astray
For they lead their flock to gorges hollow, hunting their prey[Lead: Kjellgren]
