

# I Want to Live

## Skillet

In a grave of roses, while the night is closing in  
My soul is so cold, but I want to live again  
I know you'll come to me, I wait in misery  
I want to fight for this, save me from this darkness  
I reach for the light I want to live my life  
The choice is mine, I've made up my mind  
Now, I'm free to start again  
The way I want to live (to live) and breathe (and breathe)  
The way I want that's right for me  
I may not know nothing else  
But I know this, I want to live  
[Verse 2: John Cooper & Jen Ledger]  
All I ever needed was a reason to believe  
You help me hold on, you ignite the fire in me  
You always come for me, you know just what I need  
Don't make me wait for this, save me from this darkness  
I reach for the light I want to live my life  
The choice is mine, I've made up my mind  
Now, I'm free to start again  
The way I want to live (to live) and breathe (and breathe)  
The way I want that's right for me  
I may not know nothing else  
But I know this, I want to live I'm breathing, still breathing  
But I can't fight this fear alone  
This feeling is killing slow  
But now I know
