

The Fix (Plan B Remix)

Minus the Bear

A swimming pool with no bodies
Is a problem that we can fix
He drops his clothes on the chaise lounge
And asked, "Are you gonna come in?" And in the night the only light was the glow of the surface
As they slid in the rest of them continued
Their talking and drinking
They'll never notice us So this is the difference between living and not living
These are just bodies
We have a purpose and the gravity
Pulling us from them to we The distance between our bodies is a problem that we can fix
They moved slow through the current and found their bodies touching
Her hands move to pull him under for some kind of kiss
As he slides in the rest of them continue their talking and drinking
