

As the World Burns

Kreator

The war is here, the future stops
Existence ends
Apocalypse will take our lives one by one
As cities fall, as cultures die
As hope for survival turns
Into nothingness for us
Await your fate
You know there is nothing to save us now
Mankind never learns
Controlled by violent brains
The population has to pay
Doomsday has returned
As the world burns
Try to run, try to scream, it's too late
megatons of death await to explode
To clear away fire and pain
Now the time has come
To destroy the planet Earth
Await your fate
You know there is nothing to save us now
Mankind never learns
Controlled by violent brains
The population has to pay
Doomsday has returned
As the world burns
Await your fate
you know there is nothing to save us now
Mankind never learns
Controlled by violent brains
The population has to pay
Doomsday has returned
As the world burns
