Don't Want It

Screeching Weasel

i sit alone inside my room 'cause i don't want it. waiting now for something new 'cause i don't want it. everybody's already nostalgic for the 90's- i don't want it. too many people know too much, well i don't want it. 'cause they don't really know that much and i don't want it. everyone's an expert, they all think they've got a clue but i don't want it. too much information now and i don't want it. too much self-deprecation now and i don't want it. masters of the obvious, don't try to sell me nothin': i don't want it- no fuckin' way! there's gotta be a new way. there's gotta be a new way. there's gonna be a new way. there's gonna be a new way, yeah...
