

Likethesun

Musiq Soulchild

Hey hey hey
Out of all the other girls I've ever had
You showed me that you could be the one that missin'
People talkin sayin' that you and me wouldn't last
But thankfully the don't have to listen
I know everything it's on your mind
Type of things that happen all the time
Baby we're meant to be together
In the dark but now that you seem to lie.

[Chorus]
I'm breakin' on fire girl
Like the sun, I can feel the temperature rising get you higher
On fire girl oh yeah
Like the sun, I can feel the temperature risin', get you higher.

Hey out all the girl I've dated in the past
They can gave me nothing nowhere like this special feeling
There's no other love stronger of what we have
Life with you is like the gift that came so givin'
You know that everything is on my mind
Type of things that happen all the time
Baby we're meant to be together
In the dark but now that you seem to lie.

[Chorus]
With just one touch
This love is just like shelter from the rest
The life, she â€™s the life that shine the darkest pain
The candle that she don't flame

[Chorus]
