Where Do We Go

Immature

Where, where
Where do we go from where?
I can prove my love
Where do we go from where?Let me open up to you
Let's swallow all the negativity of life
We can make it through
Only if we tryI feel your tears fall from your face into my hand
I feel the hurt inside your heart near mine
Where did we go wrong? It's no way to figure out
I know I can't live without youWhere, where
Where do we go from where?
I can prove my love
Where do we go from where?Let me open up to you
Let's swallow all the negativity of life
We can make it through
Only if we tryI miss you whispering softly in my ear
I miss your tender kiss against my lips
Where did we go wrong? I can't figure it out?
But I, I know that I love youBaby please don't go
I will never lie, lie again
Constantly I think of you
Oh yes, I doPlease stay
With me
Please stay
With meWhere, where
Where do we go from where?
I can prove my love
Where do we go from where?Let me open up to you
Let's swallow all the negativity of life
We can make it through
Only if we tryWhere, where
Where do we go from where?
I can prove my love
Where do we go from where?Let me open up to you
Let's swallow all the negativity of life
We can make it through
Only if we try
