Nifelheim

Acronym

The world of ice in the distand north
is a very mysterious place.
Among its fog and inside it's ice,
the seed of life is burried.
into a stream of water,
When the heat of Muspel turn the ice of Nifel
the creation begins to take place.
Even though the frozen water of Nifel
contains a spark of life,
this is first of all a place of death
and the world fear the lethal strength of the icegiants
who were born here in the beginning of time.
