

# Nifelheim

## Acronym

The world of ice in the distand north  
is a very mysterious place.  
Among its fog and inside it's ice,  
the seed of life is burried.  
into a stream of water,  
When the heat of Muspel turn the ice of Nifel  
the creation begins to take place.  
Even though the frozen water of Nifel  
contains a spark of life,  
this is first of all a place of death  
and the world fear the lethal strength of the icegiants  
who were born here in the beginning of time.
