

# Same Sea

## Lights

Goin' the distance, every occasion  
Headed for somewhere out of the way  
Movin' and shakin' every persuasion  
Keepin' us out there, caught in the waves  
Try to wander in the deep  
Just waitin' for the tides to meet  
And when the currents take us out again to opposite oceans  
Out of the hands of safety  
From the solace to the deepest end  
Places we break and bend  
You're the one in it with me  
No matter how far we get  
Oceans we are in still connect  
And when the currents circle back again  
They'll carry us with them to the arms of the same sea  
Ooh  
Ooh  
Ooh  
Isn't it all just part of the nature,  
Piece of the business, part of the view  
Physical labor, human behavior,  
It's an illusion I'm passin' through  
No place to stand or set my feet  
Just waitin' for the ends to meet  
And when the currents take us out again to opposite oceans  
Out of the hands of safety  
From the solace to the deepest end  
Places we break and bend  
You're the one in it with me  
No matter how far we get  
Oceans we are in still connect  
And when the currents circle back again  
They'll carry us with them to the arms of the same sea  
Ooh  
Ooh  
Ooh  
The tides were carried in, the lakes they take us out  
They come around again and bring me back to you  
When the currents take us out again  
From the solace to the deepest end  
They'll carry us with them to the arms of the same sea  
To the arms of the same sea  
To the arms of the same sea  
To the arms of the same sea  
You're the one in it with me  
In the arms of the same sea
