I Fight

Fair Warning

Riots on the misty roads of night
Faces carved in ignorance and prideLooking for another way
Trouble's down the street
The sky's on fire, I'm moving on
I got to face the heatI fight when silence breaks at night
I fight, no mercy in these eyes
And if my love is strong enough
I got to break this pride
I fight I fightCastles built on anger and desire
Waymarks in a no man's land on fireLooking for a different life
Longing for the day
And all I know's I must get out
I got to find my wayI fight when silence breaks at night
I fight, no mercy in these eyes
And if my love is strong enough
I got to break this pride
I fight, I fight, yeah yeah yeahI fight when silence breaks at night
I fight, no mercy in these eyes
And if my love is strong enough
I got to break this pride, yeahI fight, I fight
I fight, I fight
I fight, I fight
I fight, I fight
