

Jupiter, It Won't Be Long

[Ryan Cassata](#)

When I was just 15 we went to the moon
And the man there said closed but do return soon
So we ran to Jupiter
we ran around it's rings
And we crashed into it's moons but we learned all sorts of things
Like our minds are oceans as pretty as you know it
And their filled up with creatures who are all sort of glowing
And the minutes went by
And we had to say goodbye
But Jupiter, It won't be long And I drank up all the punch
Then I spit it all to hell
And my mind was playing tricks on me
And I tried to warn my friends that they would not come down
But my words they swam into the sea We were swept up in the comets
We couldn't make it home
And were thrust to mars
And the fires burned a hole
In our brains, were ruined,
the smoke filled out lungs
And we were sweating, almost sleeping, the pain has begun,
And the fevers came on like the sun came out
And it wanted my life
I was too afraid to fly,
And yes I knew it,
It's not my time to die
So please release me,
let me fly
to the moon And I drank up all the punch
Then I spit it all to hell
And my mind was playing tricks on me
And I tried to warn my friends that they would not come down
But my words they swam into the sea
But my words they swam into the sea
