

Pyramid

Two Door Cinema Club

Take me through the pyramid
Show us life and things that you did
Each and every thing I see
Takes me back before I was me
We have seen what lies beneath the earth
Everything that has ever been and will become
Where are all these singing birds
We would say but that's not what we heard
We have seen what lies beneath the earth
Everything that has ever been and will become
We have seen the world for what it's worth
Everything that's in between can still be done
Just one day is all that we needed so we could believe it all
In some way we already knew it, we just had to prove it all
We have seen what lies beneath the earth
Everything that has ever been and will become
We have seen the world for what it's worth
Everything that's in between can still be done
