

War

Ahmir

Take no prisoners
Hold the line and shoot the blame
There's something in us can't let go
We've changed
Words don't come easily anymore
And when they do
They come out wrongChorus:
And we fight
Like there's a war going on
We fight like guns and daggers are drawn
We fight all night and into the dawn
And wonder what went wrong
And we're at war
And we're at warBitter tasting
Kisses from your lips
Empty spaces between us stillChorus:
And we fight
Like there's a war going on
We fight like guns and daggers are drawn
We fight all night and into the dawn
And wonder what went wrong
And we're at war
And we're at war
Won't someone wave the white flag
There's a chance we might still last
Retreat and get back on track
All we want is our love back
Don't want us to be strangers
Is still love youChorus:
And we fight
Like there's a war going on
We fight like guns and daggers are drawn
We fight all night and into the dawn
And wonder what went wrong
And we're at war
And we're at warWon't someone wave the white flag
There's a chance we might still last
Retreat and get back on track
All we want is our love back

Dont want us to be strangers
War
I still love you
Something to change us War (repeat)
