

# Freeze

## Bimbo Jones

Felling good  
Stop me thinking it through  
Lost in you  
Tell me what can I do  
Tell the truth  
Leaving my memories to sleeping

Jealous fools  
I'm so hung up on you  
Promise you  
Truth is better, but your so confused  
Lost all my [??] your my feeling

You drove your life into me  
Twisting my mind  
You drive my mad  
The fever running through me  
It wiped me out

Fall back down here I go again  
Kill the strange  
Love the shame  
Cold and naked in a sea of pain  
Freeze the frame  
Start again

1, 2, 3 on the road again  
Step away  
Run away  
5, 6, 7 on my own again  
Freeze the frame  
Start again

I can dream  
No one takes that way  
[In between?]  
Had it good for a day  
So it seems  
You had me spinning like a lost girl

Could have been  
So much more if you'd stayed  
What a scene  
Angels falling from grace  
Such a tease  
Go chase your shadows in the wide world

Just like synthetic ruby  
Not quite authentic  
[??]  
You shined your light into me  
It burned me out

Fall back down here I go again  
Kill the strange  
Love the shame  
Cold and naked in a sea of pain  
Freeze the frame  
Start again

1, 2, 3 on the road again  
Step away  
Run away  
5, 6, 7 on my own again  
Freeze the frame  
Start again

Could have been  
So much more if you'd stayed  
What a scene  
Angels falling from grace  
Such a tease  
Go chase your shadows in the wide world

Fall back down here I go again  
Kill the strange  
Love the shame  
Cold and naked in a sea of pain  
Freeze the frame  
Start again

1, 2, 3 on the road again  
Step away  
Run away  
5, 6, 7 on my own again  
Freeze the frame

Start again

Freeze the frame x3

Freeze the frame x3

Start again
