

Gonna Make It Right

[Ryan Star](#)

Anything we should know about your change? -- working hard, hard to catch a break.. in a crowded town, tryin to find my place, and I'm so damn tired, both hands on the wheel and I call you now, cuz you know how it feels

I'm leaning on you again because I know you'd understand

Chorus - I'm gonna make it right, gonna make it right, I've been knocked down, but I've got one more fight ..
im running in the night, but I'm running into the light, this is the time and the place and I swear that I'm gonna
make it right

Working hard, hard to catch a break.. in a crowded town, tryin to find my place, and I'm so damn tired, both
hands on the wheel and I call you now, cuz you know how it feels

It's moment like this I find, I've never felt so alive

Chorus - I'm gonna make it right, gonna make it right, I've been knocked down, but I've got one more fight ..
im running in the night, but I'm running into the light, this is the time and the place and I swear that I'm gonna
make it right

Bridge- im not gonna give it up, I'm not giving in,, I'm gonna ride this wave, and if it kills me, then I know I
lived

Chorus - I'm gonna make it right, gonna make it right, I've been knocked down, but I've got one more fight ..
im running in the night, but I'm running into the light, this is the time and the place and I swear that I'm gonna
make it right
