That Was Yesterday

Pink Cream 69

"That Was Yesterday"Now it's late to love
You just left me in this empty room
Should I gaze into the coming storm
When I face the lies
I need a drink to get me by
And I taste some tears in your eyes
When the dust finally settles it's just you and me
On a journey to somewhere
I know that we'll find a way
There were days we were living and feeling so free
In our hearts there was meaning so how can it beChorus
Can you tell me why the sun don't shine
Can you tell me why you left me blind
Will you give me back again what's mine
'Cause I'll be waiting
Can you tell me why you rather stray
Were you looking for a better way
To confront the life that you betrayed
But that was yesterdayShould I close the door
On all the things that seemed so right
In my mind I shove them all the way
When the day is done
I try to wash the hurt inside
'Cause it makes me feel some kind of happiness
When the dust finally settles it's just you and me
On a journey to somewhere
I know that we'll find a way
There were days we were living and feeling so free
In our hearts there was meaning so how can it be
