The Great Unknown

Jukebox the Ghost

Walking through the heavy light
The streets are empty
And you don't feel right
And ya didn't wanna let yourself down
So be scared to get up
There's a thousand voices saying

The time is now
So let go
You're on your own
There's something waiting for ya
There's something waiting for ya

So let go
Of the world you know
There's something waiting for ya
In the great unknown
The great unknown

Keep your head up
Don't take your eyes off the road
Or you're never gonna change
By doing what you're told
And don't want to let yourself down
So don't be scared to stand out
There's a thousand voices saying

The time is now
So let go
You're on your own
There's something waiting for ya
There's something waiting for ya

So let go
Of the world you know
There's something waiting for ya
In the great unknown
The great unknown
The great unknown

In the great unknown
The great unknown
The great unknown

The time is now
So let go
You're on your own
There's something waiting for ya
There's something waiting for ya

So let go
Of the world you know
There's something waiting for ya
In the great unknown

So let go
You're on your own
There's something waiting for ya
There's something waiting for ya

So let go
Of the world you know
There's something waiting for ya
In the great unknown
