

Bibles And Guns

Sodom

They want to see our castles burning
False religions from a wicked spell
Commit crimes in ice cold blood
The tortured souls to dwell Born dead creatures live again
Paralyzed to kill themselves
Reality that disappears
Forever buried dreams The hate is spreading far away
Or in the neighbourhood maybe
When even life's collapse begins
Just what we need Bibles and guns Seems like a monumental struggle
Of good and mighty evil
Everlasting devastation
Until the death redeemed Born dead creatures live again
Paralyzed to kill themselves
Reality that disappears
Forever buried dreams The hate is spreading far away
Or in the neighbourhood maybe
When even life's collapse begins
Just what we need Bibles and guns The debris covered our hope
To sleep the endless sleep
Peace no longer rest in my brain
My victim just for me Born dead creatures live again
Paralyzed to kill themselves
Reality that disappears
Forever buried dreams The hate is spreading far away
Or in the neighbourhood maybe
When even life's collapse begins
Just what we need The hate is spreading far away
Or in the neighbourhood maybe
When even life's collapse begins
Just what we need Bibles and guns
Bibles and guns
Bibles and guns
Bibles and guns
