

It Came From the Ground (Andy Votel Remix)

Badly Drawn Boy

I hear your sound
It came from the ground and it feels so good
I see the light is fading
Let's gather the rain inside your hood I hear she's got the fever
Oh and I need her, I knew I would
Now I see you're stalling
Catch me I'm falling underground Now I sense the ground is moving
Yet something is proving me wrong I find
I see the color changing
To follow the range inside your mind I've tried to please her
Maybe I'll weave her a lullaby
The fallen trees are not yet in season
But underground A giant grain of sand could
Slip through your hand and you wouldn't know
You fly away, I'm sailing
My heart would be failing without this glow I wonder if you've seen me
With infinite greenery all around
If I could here you calling
I'd break down the walls that defend her sound
