

Wildfire

Sara Evans

I'd been on the mountain way too long
The winds blow fiercer when that sun is gone
It got so cold and lonely every night
I just prayed for something warm to melt that ice
Yeah, I was out here freezing
Till you covered me in feelings
This spark you lit inside me just won't die
Your love's like a wildfire
Running though my heart
Running through my veins
I hope it never rains
Now I'm burning in desire
But I don't feel the pain
I'm dancing in the flames
I'll never be the same
Wildfire, wildfire
Can't kill this wildfire
You could be a million miles from me
And I would still be feeling all your heat
'Cause you're the kind of man you can't escape
And even if I tried to run away
Your love's like a wildfire
Running though my heart
Running through my veins
I hope it never rains
Now I'm burning in desire
But I don't feel the pain
I'm dancing in the flames
I'll never be the same
Wildfire, wildfire
Can't kill this wildfire, wildfire, ooh baby
I was on that mountain way too long
The light was almost out but now it's on
Your love's like a wildfire
Running though my heart
Running through my veins
I hope it never rains
'Cause I'm burning in desire
But I don't feel the pain

I'm dancing in the flames
I'll never be the same
You love like a wildfire
And it's running through my heart
Running through my veins
I'll never be the same
Wildfire, wildfire
Can't kill this wildfire
Wildfire
Can't kill this wildfire
