

A Certain Kind

Soft Machine

A certain kind... of love, I'd say
Exists for me, and every night
Your kind of love sets me alight

And I know it's real, it's what I feel, what I feel...And loving you the way I do

Makes everything seem right again

And when you're near I know

I know you just can't tell the time

When you... it's just not rightAnd so our love I see in you

The things today, the things we do

And when you're near I know

You just can't see... well

I know it's real, it's what I feelAnd loving you the way I do

Makes everything seem right again

And when you're near I know

I know you just can't see

All the time of day

I know you're mine, and all the time
