

Big Enough

[Ayiesha Woods](#)

you turned water into wine, how extraordinary. gave sight to the blind and still i carry my own load when you told me to take your yoke cause yours is easy. and even though my issues seem trivial, you alone are never too imperial. it's just the way that you love me. its enough to convince me chorus; and i dont wanna box you in, you've been doing big things since the world began. sometimes i just dont wanna believe that youre big enough but your big enough yeah!! i dont wanna box you in youve been doing big things since the world began.

sometimes i just dont understand that youre big enough, but your big enough jesus
you turned darkness into light, keep my lamp burning, and you are my everything. theres no denying your love is so amazing, and even though my problems seem typical, nothing for you is ever too difficult. you never have reservations, love without limitations

chorus oh not matter how i try to get around it im reminded wherever i go im totally surrounded its all about you
i can never doubt you even if i wanted to.
