You Can Love Me Now

Hothouse Flowers

You can lean on me anytime
You can take my hand, I don't mind
Never ever worry, yeah
It mightn't ever happenOn a darkness night, come to me
When you feel alone, let it be
We won't let it win, yeah
It mightn't ever happenYou can love me now
You can love me now
You can love me now
I'm feeling something realYou can love me now
You can love me now
You can love me now
Take, take, take, take
Take, take, take meWhen I look in your eyes, I can see
There is nowhere I would rather be
These are old wounds, baby, yeahIt might just happen
It might just happen
It might just happen
It might just happenYou can love me now
You can love me now
You can love me now
I'm feeling something realYou can love me now
You can love me now
You can love me now
Take, take, take, take
Take, take, take me
