## **Superhuman Touch**

## **Athlete**

I'm on fire Nothing's gonna hold me back Endless blue sky

And a pocketful of tricks to tryOh, you pick a color and I sing it for you I know you feel the same way

Say, say, say you feel the same wayYour fingertips are like superhuman touch

Can't get enough of this electric love

Burning the sun with just a wave of your handThe sparks flying out in every direction
There's more of this to come, I think it must be heaven
Burning the sun with just a wave of your handI'm on fire

Golden echoes upon my face

Tell those dreamers

They can dream up all they like in this placeOh, you pick the color and I sing it for you I know you feel the same way

Say, say, say you feel the same wayYour fingertips are like superhuman touch

Can't get enough of this electric love

Burning the sun with just a wave of your handSparks flying out in every direction There's more of this to come, I think it must be heaven

Burning the sun with just a wave of your handAnd just one day like this will keep me going on Tender kisses will keep me going on, ohYour fingertips are like superhuman touch

Can't get enough of this electric love

Burning the sun with just a wave of your handSparks flying out in every direction
There's more of this to come, I think it must be heaven
Burning the sun with just a wave of your handSeems like hell has broken loose

It couldn't be more beautiful

I just want to burn the sun with youThe messed up garden to inspire

The greatest minds in all of power

I just want to burn the sun with you

And just a wave of your hand
