

# I Sing I Swim

## Seabear

When the birds are sleeping  
That's when the trees sing  
You left your winter clothes  
And your teeth marks in my skin  
So shake the leaves off the trees  
Watch them float down the stream  
Your son, your daughter  
Swimming in the water  
I miss you  
Even when you're around  
A black cloud  
Sending lightning to the ground  
Darling, please show your teeth  
Just one more dance to help me sleep  
All good, cold water eyes  
Fill the past with friendly nights  
Human skin can be hard to live in  
You'll feel better in the morning  
Swim, wash your hands in the lake  
Swim, you got a heart in the way  
Trails lost in the snow  
Make way for winter's eerie glow  
And that black rock in your bedroom  
I hope you'll climb it soon  
In your boat tied to a tree  
I hope you'll find the sea  
Throw me a dream please  
It's been a dreamless sleep  
For such a long time  
Such a long time  
Sing myself awake  
Watch the branches break  
No one could  
Ever take your place  
Swim, wash your face in the lake  
Sing, you've got a diamond under your skin
