Ice House

Sleeper

you know that id have done it anyways
with or without
youve heard that ive turned both my shoulders
many times beforeand now after all those fading yesterdays
i may do it again
so if it seems a little colder
thats because it ismake it
then unmake it
just to make it again somewhere elsetheyre so fond of you
theyll drink the water that you tread,
dont let it go to your headyoure directionless
youd only know your right from left
if it would turn a headand ive dined for lessi guess that when your dogs are fed,
they end up in your bednow go make sure the dogs are fed,
and watch it go to your head
