

# Future

## Jagged Edge

(It's a heartbreak)

I feel like a penetrating water on some quicksand  
Rising to my knees when you're not around  
I'm breaking every border, every rule  
Now pertaining to what's doing  
What we said, when we started out  
And them church bell rang, and cupid's straight spray  
And I even took my 5 shots in the heart  
Girl, just for you  
I don't need no medicine  
All I really need is a touch from you  
Girl, I do see my future with you

When I look in your eyes, I see my future in you  
Till I get newborn child, I see my future with you  
I walk a million miles to have a future with you  
When I look in your eyes, I see my future with you  
See my future with you  
See my future with you  
See my future with you  
See my future with you

I see me and you cross the border  
And a nice little house on the water  
Or a villa, just for me and you  
Using every inch of this tool  
But with the drama that's been popping up  
It'd be a shame, if we can't do it  
But the fat lady ain't sang yet  
And the new style that ain't hang  
See I'm trying to take us back to the beginning  
When every day was alright  
And we really couldn't stand to fight  
I just want you here with me  
Please don't take away my future

When I look in your eyes, I see my future in you  
Till I get newborn child, I see my future with you  
I walk a million miles to have a future with you

When I look in your eyes, I see my future with you  
See my future with you  
See my future with you  
See my future with you  
See my future with you

You can catch me start early daydreaming you  
Well, if that's what you really want  
And you don't want to be involved with you  
Make me wanna be involve with you  
And baby, you're my future

When I look in your eyes, I see my future in you  
Till I get newborn child, I see my future with you  
I walk a million miles to have a future with you  
When I look in your eyes, I see my future with you  
See my future with you  
See my future with you  
See my future with you  
See my future with you
