

Crystal Flame

Blues Traveler

Sitting in clover lookin' for the fifth leaf
Something soon will come my way, yeah
Never failing to amaze me
I feel its wisdom anyway Rays of sweet illumination
Inspiration too untold
I hope some day I can befriend it
I think that comes with growin' old Crystal flame, I'll do anything you say
You're my heart and my mind and my soul
At least you fill them when I play, yeah Light so bright it hypnotizes
But it never hurts to gaze
Never to burn or char with fire
Simply the heat from warmer days And when the moment tends to savor
When my song is close at hand
The frozen ember fills my vision
Letting the brightness take command, take command Crystal flame, oh, I'll do anything you say, yeah
You're my heart and my mind and my soul
At least you fill them when I play, when I play Please, please, won't you take me away?
It's easy, it's easy, won't you let me play? Sometimes it's brilliance all around me
Sometimes it's light I barely see, yeah
And though I utilize its grandeur
It does not belong to me 'Cause all I can do is vague description
As I do my best to share, yeah
The smooth perfection I can only dream of
The flow of all the life that's there, life that's there Crystal flame, oh, I'll do anything you say, yeah
You're my heart and my mind and my soul
At least you fill them when I play Keep me safe and never lonely
Let the rain fall where it may, yeah
And let me find the peace within me
I can find it when I play They say that solid, wet or vapor
The only forms that are portrayed
To them I ask one burning question
Of what stuff are ideas made, are they made? Crystal flame, oh, I'll do anything you say
You're my heart and my mind and my soul
At least you fill them when I play, when I play Crystal flame, oh, I'll do anything you say
You're my heart and my mind and my soul
You're my heart and my mind and my soul
Fill me, fill me, fill me
When I play, when I play, when I play, when I play
Do anything, anything you say Sitting in clover lookin' for the fifth leaf

Something soon will come my way, hey yeah, yeah
